

P2: Sprint 1 Project Progress Report (1-2 pages):

Sprint 1: March 3 to March 17

Status update of the project/progress made/ What process is the team following to work on their tasks and collaborate with each other

As a group, we've started to make progress toward our project. We've begun working on the HTML framework for our website (Kush Patel), creating a variety of workout routines (Mason/Chris), and establishing a template for the database system (Mark/Vamsi). Additionally, as a group, we've discussed the workout planner and focused on its functional and user-friendly design. We ultimately decided on the user choosing which type of workout they would like to have on each day (Mon. - Sun.). This development phase works towards our delivering a well-rounded and efficient online fitness solution.

Any issues/challenges faced during Sprint 1?/ How is the group trying to overcome the issues?

Some of the challenges we faced during Sprint 1 included figuring out ways to merge the code to ensure it worked. Another issue we have as a group is communicating and making sure that all team members are on the same page. For example, how do we want certain things displayed on a website? However, we've decided to meet during class on Thursdays to work on our project and plan. This phase of development has not only brought us closer as a team, fostering a stronger sense of collaboration, but it has also paved the way for more efficient and comprehensive outcomes.

Which tool(s) the team is using to assign tasks for Sprint 1 and work together:

TOOLS USED	git, vscode, mySQL
------------	--------------------

List of tasks assigned/completed by team members during Sprint 1:

NAME	TASK COMPLETED
Kush Patel	Code HTML part of the website that includes the BMI Calculator, Homepage, MenuPage
Vamsi Mannava	Creating the Template and layout of the Database with Mark
Mark Perez	Creating the Template and layout of the Database with Vamsi
Mason Jennings	Research on workouts – worked with Chris on the schedule
Christopher Contreras	Research on workouts – worked with Mason on the schedule
Moksh Patel
